Click to jump to section:

Do you have a four-legged friend that is always trying to sneak out and explore the neighborhood? It may be time for a pet door! A pet door can provide many benefits including keeping your furry friends safe inside, giving them their own private space to potty, and making it easier for you when they need to go outside. Whether you are home full-time or have to leave your pet alone hours a day, a quality pet door represents a wonderful opportunity for you both.

Benefits of Pet Doors

The positive things a pet door can do for both you and your furry friend are surprisingly diverse. Here are some of the benefits of pet doors:

- Makes life easier for you
- Pet Doors offer convenience for owners as well as pets
- Keeps pet away from indoor accidents
- Enhances physical health through regular exercise and stimulation
- Pet Doors help reduce housebreaking accidents

- A pet door will encourage your animal to spend more time outdoors, leading to a healthier lifestyle and a stimulated mental state

Need a pet door for your furry friend? Now is the time! Call our experts today and find out how easy it can be.

Why Choose Our Energy-Efficient Pet Doors?

There are many types of pet doors on the market today. But, the Advanced energy efficient dog door for sliding glass doors is not your average pet door product. The energy-efficient glass we use for your replacement sliding glass door provides exceptional insulation quality. You can live more conveniently with your dog coming in and out without your help, and you can improve your home's energy efficiency too!

What Makes the Our Pet Door Energy-Efficient?

There are multiple industry-leading elements of the Advanced Window Products pet access door that make it today's best energy-efficient pet door:

- *Sliding Door Frame*: The construction-grade vinyl sliding glass door frame is highly durable and weather-resistant.
- *Thermal Door Glass*: The glass panel in which the pet door is installed is made of Low-E glass for maximum thermal efficiency.
- *Endura Flap*: The polyolefin polymer dog door flap is made to withstand extreme temperatures (to -40°F) and other rough outdoor conditions.
- *Magnetic Seal*: The top-quality Endura Flap pet door is lined with magnetic strips that ideally seal the flexible dog door flap instantly as your pet enters or exits!

Advancements in Pet Doors

In the past, there have been two strong and reasonable arguments against installing a pet door:

- *They reduce efficiency:* The gaping hole in a major pathway to the great outdoors inevitably raises heating and cooling costs throughout the year.
- *They present a security risk:* Pet doors are typically much less secure against break-ins than doors and walls without such an exploitable weakness.

Thankfully, both issues have been tackled!

For efficiency, recent innovations use improved materials and techniques to minimize airflow and almost entirely stop negative temperature effects. Magnetic stripping helps create perfect seals; coupled with polyurethane foam, fiberglass, and other advanced materials, this adds substantial insulation improvements to the doors themselves.

As for security, stronger materials and tight seals are a good place to start. Pet-sized ramps or staircases create access points far above the ground that are friendly for your dogs and cats but quite inaccessible to ill-meaning humans. Similarly, ground-level access can be placed in trenches or regions that won't work for human travel. Lastly, improved flap locks make pet doors impenetrable for extended absences.

Installation of Your Energy-Efficient Pet Door!

In addition to beautiful doors for your home, Advanced Window Products also provides energy-efficient pet door installation for you. You and your pet can enjoy the freedom of having a state-of-the-art pet door for sliding glass doors. With this Advanced pet door model, you don't need to cut a hole in a wall or door to install a pet door, and you don't need to alter the framing of your sliding glass door.

How do we do it? We build a top-quality pet door directly into our high-performance sliding doors, and our professionals can install it for you! In addition to delivering top energy efficiency, this [sliding glass door pet door](#) actually offers you today's most convenient way to install a pet door for your home!
