## Vinyl Siding Replacement Utah, Services that have Transformed Homes Across Utah!

**Are you wanting a cost-effective to give your home a makeover?**

Have you been looking for a new shield of protection from the wind, rain, snow and the changing temperatures of the outdoors? If you are looking for an outdoor siding option that will **withstand the elements** and **fits your budget**, **vinyl siding** may be the best option for you. At [Advanced Window Products](#) we have been installing siding for 25 years. With a variety of colors and styles to choose from, you'll enjoy your home's sleek new look. You'll never have to paint again! Plus, our siding offers you a buttoned up, sealed up and spruced up protection for your home especially when combined with our [vinyl windows Utah](#).

## Insulated Vinyl Siding

*Insulated vinyl siding* is a great option for those who are looking to **save money** not only on home repairs but on energy costs as well. Insulated siding can **absorb up to 5 times higher impact** than traditional siding, helps to **prevent leaks** and **weather damage**, and can help **reduce your energy costs** by up to 30%. Additionally insulated vinyl helps to **reduce noise** outside the home and it's thicker shape give your home a more finished look.

## Vinyl Siding Accents

*Vinyl siding accents* are a **cost effective** way to add some **design** and **character** to your home. Some vinyl siding accent options include **mounts**, which can be used to *hold light fixtures or mailboxes*; **shutters** used to add *accent to windows*; **gable vents**, to *optimize ventilation*; and **moldings** to add *decoration to your siding* project. As with other vinyl siding products, vinyl siding accents are **extremely low maintenance** as well as **durable**. If you want to **add a pop of color** to your home, or simply **add some distinctive features** to your exterior, some vinyl accents would be a good option for you.

## Horizontal and Vertical Vinyl Siding

There are many **benefits** to choosing *horizontal and vertical siding*. Horizontal and vertical siding can provide a significant **reduction in your heating and cooling costs**, are **durable**, help **protect against inclement weather**, and can **withstand up to 240 mph winds**. Additionally, the insulated nature of vinyl siding helps it **absorb exterior sound**. Vinyl siding not only **adds to the visual aesthetic of your home**, it is also **easy to maintain** and **clean**. Vinyl siding is **available in multiple colors** and is a great option for **any kind of budget**.

## Vinyl Siding Trim

*Vinyl siding trim* is important to **create curb appeal** for your home, as well as to *finish off the rough edges* of the vinyl siding. When deciding on a trim, you will want to choose one that is **aesthetically pleasing** for your house and has the **right level of quality to protect against weather damage**. Siding trim comes in a wide **variety of colors, lengths, and widths**, therefore making any design you choose a possibility.

## Soffit and Fascia Replacement

*Soffit* is the material that is on the underside of your roof overhang and is **ventilated to help promote airflow and circulation**. The Fascia is the term used to describe the edge portion of the roof that is attached to the soffit and gutters, providing a **barrier** between the roof and the outdoor elements. Harsh weather elements and time can cause wear and cracks to these areas, which can create water damage and also create an opening for small pests. Making sure your Soffit and Fascia are in good condition will not only **protect your home** but make it more **aesthetically pleasing** as well.

## Vinyl Siding Installation

When it comes to *vinyl siding installation*, it is important that it is **installed properly**. If any of boards are nailed too tightly or there are gaps around doors or windows, you can end up with major damage, such as leaks and buckling. Hiring **professionals** to ensure proper installation will not only help **prevent damage** to your siding and home in the long run but will also keep the outside of your home looking **newer longer**. While vinyl siding installation project times will vary due to the amount of siding installed, you can expect at least two weeks on average for a siding project to be completed.

With our focus on **quality installation** and use of Mastic Home Exterior's vinyl siding product, your Utah home will be sealed tight from the natural elements. We offer a **V.I.P. limited lifetime warranty** on parts and labor to prove it. We go the extra mile on quality installation on every step of the process. We have **25 years of experience** installing siding. We have a siding license from the state of Utah and are **Certified Installation** Installers from the Vital

## From Start to Finish, Our Vinyl Siding Replacement Utah

Before this home has its siding replaced, you'll notice aging, yellowing and wear. Many homeowners experience extreme temperature fluctuation, seeping air and out-dated appearance.

### Revealing the Aged, Worn Insulation

Our craftsmanship is never compromised by cutting corners or taking shortcuts.

Here we have removed the old siding and have revealed aged, worn insulation.

### Your Home Makeover Starts Underneath What You See

Here you can see that the home has been given a fresh panel of wood, followed by three-quarter inch foam insulation. (We are the only company that provides insulation that thick!)

Our foil backed insulation offers a double water barrier.

There is no harmful silica dust.

### Waterproofing, Noise Reduction, and Weatherproofing

We tape all our seams by hand. You won't hear the wind or feel seeping air.

Instead of stapling, we nail all of the vinyl product into the studs.

Quality comes first with the siding product we use and the installation we perform.

### Voila!

The job is perfect before we leave, so we don't expect to come back for repairs.

Here is a note from one of our happy customers, *“even the smallest intricate details were not overlooked, but are skillfully completed.”*
